Stainless Steel Brush with PVC base

Brass brush with PVC base

Name of the product: Stainless Steel brush and Brass brush

Manufacturer: Access Printing Solution, le Pont de Dranse, 74500 Publier France

Packaging: Boxes of 10 units

Aim of the Product:

- **Stainless Steel Brush:** Cleaning brush for ceramic anilox rolls.
Specificities: 10.5 x 6.5 PVC base with 20mm x 80 μ bristles
High resistance to weariness, solvents and water.
To be used exclusively on Ceramic anilox rolls
- **Brass Brush:** Cleaning brush for chromed rolls.
Specificities: 10.5 x 6.5 PVC base with 20mm x 80 μ bristles
High resistance to weariness, solvents and water.
To be used exclusively on chromed rolls

Our brushes are made to help remove from the cells of the rolls all materials dissolved by our chemicals. Their life time is extended due to plain PVC base compared to wooden base brushes.

The dimensions of 80 μ of the bristles is the best compromise between durability and cleaning of the anilox cells dimensions.
